

to whom it may concern            i live in the metropolitan new york area and have xm radio in my car and in my home. besides this service being more superior than any fm or am stations it is also 100% more constructive in the sense that its 24 hour weather and traffic reports are life saving instruments which can help in bad weather or heavy traffic, by taking this most valuable service away from us may cause injury or even death by not having instant information being fed to us by xm radio. i urge you not to cancel this most important service given to us at no extra cost

thank you  
harry dickran
